Kasco Model Number scheme:

To obtain the correct Kasco Model number from this price list, you must add the cord length to the end of the base model (Base model is the text under the "Unit / Cord" column that is not in parenthesis)

Examples:

- 50' cord - add 050
- 100' cord - add 100
- 150' cord - add 150
- 200' cord - add 200
- 250' cord - add 250
- 300' cord - add 300
- 400' cord - add 400
- w/bottom screen - add "Btm Scr"

Unit \ Cord	50' model #'s	100' model #'s
3.1JF (w/C-85 Control)	3.1JF050	3.1JF100
2400A (no float)	2400A050	2400A100
2400AF	2400AF050	2400AF100
2400AF (w/bottom screen)	2400AF050 Btm Scr	2400AF100 Btm Scr

Warranty:

Kasco Marine, Inc. warrants products to be free from defects in material or workmanship (except for the ropes, power cord, and propeller) under normal use and service. The Kasco Marine, Inc. obligation under this warranty is limited to replacing or repairing free of charge any defective part within the warranty period. Customer shall pay shipping charges for returning the unit to Kasco or an Authorized Repair Center.

Warranty is void if:

- The product is not maintained properly according to the Maintenance Recommendations supplied in the owners manuals.
- The product is returned for repair without the power cord
- The unit, control box, or power cord are altered in any way from original shipment.

Cuts in the power cord and field splices are not covered under warranty.

Clarification of Cord Warranty:

- If the cord plug was cut off and the unit was hardwired, it is covered under warranty.
- If the unit was hardwired and got water in the cord from the end of the cord, not sufficiently sealed, then it is not under warranty.
- If the cord was spliced, the unit is under warranty but not the cord. If the cord leaks water to the motor and causes collateral damage, then that damage is not covered under warranty. If the cord is spliced the UL designation is lost.
- The product is not used with the supplied GFI control box.
- The product is damaged by unauthorized tampering.
- The Sacrificial Zinc Anode around the propeller shaft shows significant deterioration. (The Anode must be inspected periodically and replaced if necessary.)

Warranty period:
